

Sweet Corn

Legion

Legion features an excellent agronomic and disease package. This bicolor shipper corn is similar to Garrison with straight rowing, good tip fill, an excellent husk cover, attractive flag leaves, and a uniform ear size. Well suited to the East and Southeast US, Legion provides reliable high yields out of the field.

TRIAL DATA*	
Endosperm Type	sh2

High Resistance (HR)	Et / Ps: (Rp1-d), Ps (Rp1-i) / MDMV
Intermediate Resistance (IR)	Bm / Pst

Garrison

Garrison (formerly GSS3186) features a comprehensive disease package for the Southeast US shipper market. This sweet corn offers strong husk protection, a uniform shipping ear, and excellent tip fill for the Fresh market. Growers looking for a high yielding variety with a strong plant, straight rowing, and a wide area of adaptation should choose Garrison. Its strong disease package includes high resistance to most strains of rust, northern corn leaf blight, and maize dwarf mosaic virus as well as intermediate resistance to Stewart's wilt and Southern corn leaf blight.

TRIAL DATA*	
Endosperm Type	sh2
Kernel Color	Yellow
Approx. Days to Maturity	79
Ear Length	8
Ear Diameter (in.)	1.85
Row Number	18
