

W i n d s o r

Windsor broccoli is an excellent mid-season choice for Northeastern U.S. and Southeastern Canada. This variety has handled warmer temperatures and kept its medium-sized beads tight when other varieties' florets have spread and loosened. In high density plantings, Windsor has offered high yield potential and maintained its uniformity. Even in the main season planting slot, Windsor has kept its dark blue-green color when other varieties have faded. Together, these features translate to higher packouts of a highly marketable product.

T R I A L D A T A

Approx. Days to Maturity	85 Warm 105 Cool
Head Shape & Size (in.)	Semi-dome 5 - 6
Average Plant Height (in.)	23
Location	Northeast U.S. East Canada San Joaquin Valley Pacific NW British Columbia
Disease Resistance or Tolerance*	DM*
