

A Standard for Quality in the East

Mountain Spring

Mountain Spring sets the standard for quality tomatoes, having produced excellent size and firmness for the Carolinas, the Midwest, and the Northeast. Developed by Dr. Randy Gardner at North Carolina State University, Mountain Spring has proven its ability to produce high yields year after year. Its excellent quality fruit tolerates cracking, has uniform green shoulders, and can stand up to the harsh growing conditions in the East.

TRIAL DATA

Approximate Maturity	Early-mid season
Culture	Stake / Bush
Approx. Size	Mostly extra large and large
Fruit Characteristics	Globe. Uniform green shoulders. Firm and tolerant to cracking.
